Technical Bulletin F2-07

Use of Foundry Shakes, Shingles and Shapes as a Mansard Roof Covering

The Foundry Shakes, Shingles and Shapes may be installed for Mansard Roof Applications within the following limitations:

- ✓ Roof Slope must be >450 (up to and including a 12:12 pitch)
- ✓ Foundry Shakes, Shingles and Shapes are not a waterproof cladding material – precautions must be taken to prepare the roof deck to handle water which will ultimately drain down the roof surface
 - a. Reference section R905- Requirements for Roof Covers from the 2000 IRC for proper flashing and roof deck preparation for mansard roof applications.
- ✓ All other recommendations for installation of Foundry Shake, Shingle and Shapes found in The Foundry's published *Installation Instructions and Guidelines* must be followed.
